**HTML • JavaScript (+ jQuery) • CSS
• Ajax • PHP**

About

IT has always been my passion. This is why, when I was younger and my friends were playing computer games, I was reading source codes of websites and trying to make my own apps instead. My commercial experience isn't big, but I learn really fast, what always used to surprise my teachers. As a freelancer I made my own portfolio (React.js) and one commercial project (<https://stolarniapodjalowcem.pl>), mostly in js). More information on my website <https://cybulskimateusz.com>

Education

- **Java od podstaw do eksperta - twórz własne aplikacje**

Java Udemy course made by Arkadiusz Włodarczyk

- **Modern React with Redux [2019 update]**

Stephen's Grider Udemy course

- **Technikum informatyki edukacji innowacyjnej**

Technical equivalent of High School, IT teachings-oriented with specialistic preparation to advanced IT exams.
